

## Share Listings to Facebook Pages

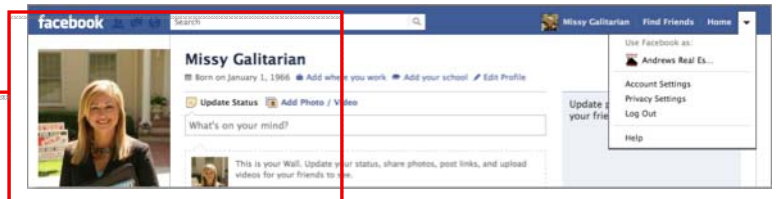

In the past, Homes & Land made it possible to post listings to your personal **facebook** “wall”. If you also manage a **facebook** business page, you could place a “My Listings” tab on your business page, which would display a list of your current listings.

Now you can also post listings directly to your business pages’ “wall”. With the updated feature, you can choose to post listings to your personal wall, to any of the pages you manage, or to a mix of both. This brief walkthrough will show you how.

### Step-by-step walkthrough:

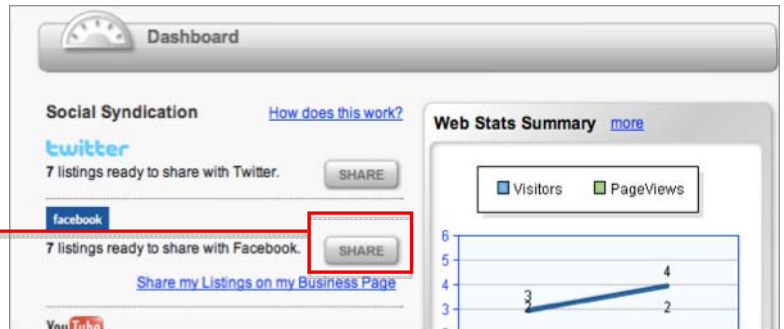

#### Step 1:

Make sure you are logged in to your **facebook** account and “using” **facebook** as your main account (not as a page).

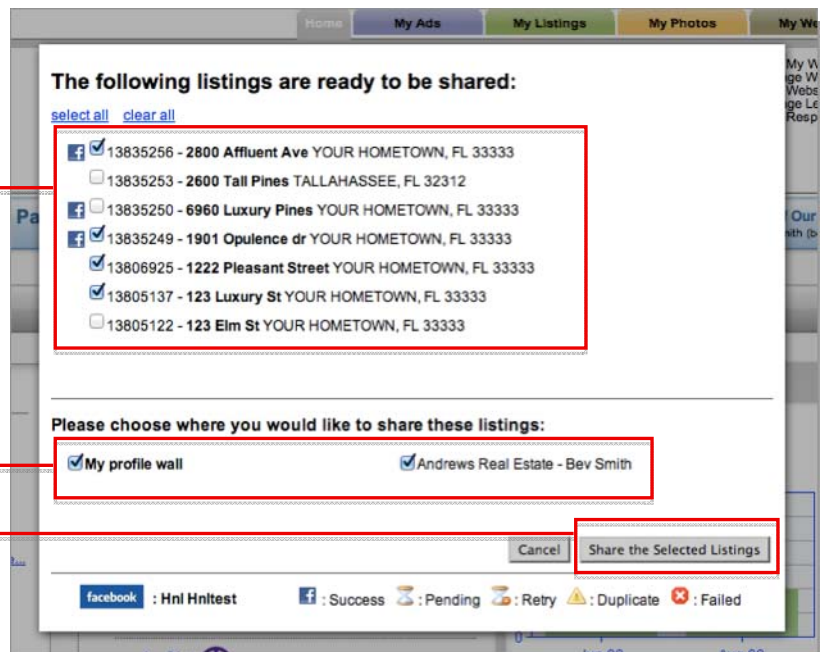

#### Step 2:

Log into your HomesaAndLand.com control panel, and click the option to **Share** listings to **facebook**.#

#### Step 3:

Select the listings you’d like to share.

#### Step 4:

Select the places you’d like to post your listings. Click **Share the selected listings**

Listings are posted to the wall of the selected **facebook** accounts and pages.
